

Clear identification, cleanliness, sterilizability, and permanence are offered with AdvantaPure's AdvantaLABEL tagging system. AdvantaLABEL eliminates the issues involved with old-style metal, plastic, or even paper tags. Since the label is sealed to the hose in clean silicone, it can be either steam sterilized (SIP) or chemically cleaned (CIP) many times without degradation of the label.

AdvantaLABEL is custom configured to your requirements – part number, manufactured date, planned replacement date, or any specific information you deem critical. Contact your AdvantaPure representative today to see how AdvantaLABEL can solve your hose tagging needs.

KEY FEATURES

- O.D. mounted to reinforced silicone hoses – does not contact material flow
- Permanently vulcanized silicone
- Certified free of animal-derived ingredients
- Easy to read – remains bright after repeated sterilization
- Autoclavable
- Zero entrapment
- Handles clean-in-place (CIP) or steam-in-place (SIP) processes
- Customer supplied text is application specific
- Add color striping for quick line identification – 10 standard colors available*
- Field installation methods available
