

SINGLE-USE SILICONE MANIFOLD CONNECTIONS

STYLES & SIZE RANGES

Certain styles now available in a high pressure version

Single use silicone manifolds are manufactured by molding straight sections of tubing or hose with connectors such as T's, Y's, and reducers. Molded connectors provide a seamless transition for a continuous, unrestricted, leak-proof flow by eliminating the use of barbed fittings. Manifolds are custom made to your specifications and available with **validated sterility assurance** of 10^{-6} per ISO 11137 method VDmax. Choose from the connection options listed here or suggest your own.

AdvantaPure's manifold connectors are not intended for implantation or continuous steam applications.
