Ref: DCR 2008

Dear Valued Customer,

This letter is to inform you that effective immediately, NewAge Industries AdvantaPure will discontinue the manufacturing of APSW-P 4-Ply Wire Reinforced Mandrel Wrapped Silicone Hose products. Specifically, the lines being discontinued will be limited to the following two hose styles:

- 1) APSW-P: Smooth OD Linear Wrapped Hose -- A725 Part # Series
- 2) APSW-PC: Convolute OD Linear Wrapped Hose -- A727 Part # Series

The reason for the discontinuation is that one of our suppliers has had repeated nonconformance issues that can not be rectified. We currently have product inventory that meets our quality standards that is available while supplies last.

NewAge Industries AdvantaPure is committed to providing our customers with the highest quality products and level of service. We understand that the elimination of these products may create a challenge for our customers. We do have an alternative hose product option that we deem to be a better, more consistent product utilizing alternative suppliers than the discontinued products above.

We would like to recommend using our stock APSW-SP Smooth OD Spiral Wrapped Hose (A718 series) as a better alternative moving forward. The same NI 202 Platinum Cured Silicone Liner is used in our spiral wrapped offering and is supported with the same Validation Package. Product information can be referenced on the AdvantaPure website at <http://www.advantapure.com/apsw-silicone-hose.htm>. If you have any questions about this notification, please contact me at 215-526-2300 or akakad@advantapure.com. Thank you for your understanding regarding this matter.

Sincerely,

A handwritten signature in black ink that reads "Alex Kakad".

Alex Kakad
AdvantaPure Product Marketing Manager
